
ERRATUM

The South-East Marine Protection Forum's consultation document, PROPOSED MARINE PROTECTED AREAS FOR NEW ZEALAND'S SOUTH ISLAND SOUTH-EAST COAST, published on 25 October 2016, contains errors within Volume 1.

Page 62:

Under the proposed site 'D – Pleasant River to Stony Creek', Figure 18 relating to Commercial Fishing Intensity contains incorrect information. Please replace this figure with the table supplied below.

The document has been updated online with the correct information as of 1 December 2016. This is available at <https://south-eastmarine.org.nz/yoursay/>

Commercial Fishing Intensity

The percentage of the regions fishery that would be displaced by the proposal is shown in the table. Displacement relates to the fishing that occurs within the Forum region, not at the Quota Management Area (QMA) Displacement does not directly relate to an impact on a fishery, but provides a relative indication of the potential impact restrictions may have.

	FISHERY DISPLACEMENT (%)	
FISHERY	OPTION 1	OPTION 2
Pot – Rock lobster	5.4	11.3
Line (bottom longline and dahn line)	0.7	1.5
Dive – Pāua	0.4	0.5
Pot – Blue cod	0.3	0.8
Dive – Other	0.1	0.2
Trawl – Flatfish	<0.1	0.1
Trawl – Gurnard	<0.1	0.1
Trawl – Other	<0.1	0.1
Trawl – Red cod		<0.1
Trawl – Tarakihi	<0.1	0.1

Figure 18: Commercial Fishing Intensity – Pleasant River to Stony Creek Type 1.

Pages 76 and 181:

Under the proposed site 'H – Papanui Canyon', Figure 24 and 71 relating to Habitats contains incorrect information. Please replace the information in these tables with the information highlighted below. The document has been updated online with the correct information as of 5 December 2016. This is available at <https://south-eastmarine.org.nz/yoursay/>

Habitats included within Alternative 2

Area (km) is the area of that habitat type that is included within the site. Area (%) refers to how much of the habitat type within the entire Forum region is included within the site.

COASTAL HABITAT TYPES	G – BRYOZOAN BED (TYPE 2)		H – PAPANUI CANYON (TYPE 1)	
Deep Gravel	111.1	2.4	5.2	0.5
Deep Mud	24.8	2.4	0	0
Deep Reef	15.9	4.6	0	0
Deep Sand	0	0	83	1.8
Deep Water Sand	0	0	18.1	24.7

SENSITIVE HABITATS	G – BRYOZOAN BED (TYPE 2)		H – PAPANUI CANYON (TYPE 1)	
Bryozoans	138.4	32.1	75.1	17.4

Figure 24: Habitat types within the proposed alternative 2.

COASTAL HABITATS	PROPOSED MARINE RESERVE MPAS (KM ²)					
	B – WAITAKI COASTAL	B – WAITAKI COASTAL (EXTENSION)	D – PLEASANT RIVER TO STONY CREEK (OPTION 1)	D – PLEASANT RIVER TO STONY CREEK (OPTION 2)	F – SAUNDERS CANYON	H – PAPANUI CANYON
Deep Gravel	0	0	0	0	15.4	5.2
Deep Mud	0	0	0	9.6	0	0
Deep Reef	0	0	0	0	8.2	0
Deep Sand	0	0	0	1.7	109.8	83.0
Deep Water Sand	0	0	0	0	52.5	18.1

Figure 71: Area of individual coastal habitat types covered by each marine reserve MPA (Type 1). Where a number is given, it refers to different options relating to the boundaries.
